### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-21, drawn to overlay metrology marks.

Group 2, claim(s) 22-25, drawn to a method of determining relative position between two or more layers of an integrated circuit structure.

2. The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group 1 is comprised of the special technical features of having only two test and where in at least five test structures in each direction are present AND the overlay metrology mark comprising more than one pair of test zones AND wherein the elongate rectangular mark structures comprised arrangements of substructures. These listed special technical features are not found in group 2, therefore, group 2 lacks the special technical features of group 1.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

If the applicant elects group 1, these are the different species:

Embodiment 1 as shown in figure 1

Embodiment 2 as shown in figures 2 and 3

Embodiment 3 as shown in figure 6

Art Unit: 2811

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1, 2, 3, 7, 11, 16-20 and 21 corresponds to embodiment 1

Claims 1, 2, 3, 4-6, 8-11, 16-19 and 21 corresponds to embodiment 2

Claims 1, 3, 12-15 and 21 corresponds to embodiment 3

The following claim(s) are generic: 1, 3, 21.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Embodiment 1 discloses the special technical feature of only two test zones are present and wherein each mark section comprises at least five test structures in each direction, which is the special technical feature lacking in the other embodiments.

Embodiment 2 discloses the special technical feature of the overlay metrology mark comprising more than one pair of test zones, which is the special technical feature lacking in the other embodiments.

Art Unit: 2811

Embodiment 3 discloses the special technical feature of the overlay metrology mark, wherein the elongate rectangular mark structures comprise arrangements of substructures constituting together a general elongate rectangular outline which is the special technical feature lacking in the other embodiments.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
